

**Environmental Remediation  
Technologies**

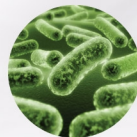

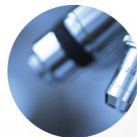

# ***A Different Kind of Company***

ERT, Inc. was founded in 1978. As one of the very first asbestos abatement contractors in the State of California, we quickly expanded and began to evolve as an inspection, testing, and consulting firm specializing in not only Asbestos but also Lead, Radon, Mold, Indoor Air Quality, and Sewage Contamination. As our business continued to grow, we changed the name officially to Environmental Remediation Technologies, Inc. in 1997 to reflect the deviation from asbestos abatement to one of the most highly respected versatile consulting firms in Northern California.

Starting as a family owned business, ERT, Inc. prides itself on one on one exchanges and exception to detail with each and every client we deal with. Our aim is to provide you with the highest quality services at the best price. We have an experienced staff of highly trained professionals to provide you with the highest quality environmental services. Our company is financially sound, not overextended and is committed to being here to serve your needs for years to come.

***Our services include testing for:***

- Asbestos
- Mold
- Lead
- Indoor Air Quality
- Radon
- Sewage Contamination
